## Lethbridge Picnic A Grand Success

Thursday was surely a red-letter day in the history of The Pass, and more especially in the history of the rising town of Blairmore, when the Independent Order of Oddfellows, under the auspices of the three Lethbridge lodges, gathered for their annual picnic.

This is the first Oddfellows' picnic to be held at this point, and that everyone who attended were impressed with the adaptability of Blairmore as a holiday resort there is no doubt, for all seemed to wear smiles broader than their features could really accommodate and speak in terms of our scenery, mountain air and hospitality which give assurance that this burg will be made a rendezvous as a picnic resort and magnet for excursionists.

The town was handsomely dressed in colors befitting the occasion and displaying taste on the part of the decorating committees. Citizens in general turned their hands to lend assistance in the effort to make Blairmore appear slightly more than the ordinary, which task would appear an impossibility to those whose first opportunity it was to see "over what we have to boast of in location and scenery."

The special excursion train from eastern points arrived at 11:30. This train was made up of twelve cars and landed over eight hundred people, most of whom were from Lethbridge. Many hundreds also arrived by the "local" from west about an hour later.

The members of the local lodge were lined up near the station ready to have their forces augmented by Macleod, Fincher Creek, Cowley, Mounarch, Taber, Grassy Lake, Claresholm, Coleman, Michel and the three Lethbridge lodges. The procession comprised over nine hundred men, including the Coleman brass band.

Floats formed an important feature of the procession. That of the F.M. Thompson Co. displaying their line of business and conveying a Moka coffee grinder, took first prize. This float was certainly the work of art and its neatness and blending of colors were really attractive. The second prize was awarded Messrs. Berry and Doubt, who demonstrated the Oddfellows' hospital work. Their float was chitinous of much attention and admiration. The ship represented the sickbed, the patient, nurse, doctor and attendants, and was certainly unique as well as very original. Third in order was a representation of Smallwood's blacksmith shop, which was also good. Brisco's Store for men took the fourth prize. The judges in the float competition were C. J. Eckstorm and Fritz Sick, of Lethbridge, and Rev. W. H. Muncester, of Blairmore. Starting from the depot at 12 sharp, the procession marched to Seventh Avenue, where they

turned to State Street, thence south by Tenth Avenue, west by Victoria Street and north to the picnic grounds via Sixth Avenue. Here preparations had been made for the visitors and for the carrying out of the long programme.

After the contents of many baskets had been ravaged and the waitresses at the hotels and restaurants had been taxed in their efforts to satisfy the hungry folk from the prairie, the programme was started at 2 p. m. The programme was in the following order:

Timing Breast Jump—W. Turner, 2nd H. E. Lyon.  
Hop-Step-and-Jump—W. Turner, 2nd Harold George Bigelow.  
High Jump—J. A. McDonald, 2nd W. Turner.  
Ladies' Race (50 yards)—Miss M. Boyd, 2nd Miss Hilda Doubt.  
100-Yard Dash (men)—Arthur W. Fleming, 2nd Alex. Pearson.  
50-Yard Dash (boys under 16)—W. J. Evans, 2nd Donald McLeod.  
50-Yard Dash (boys under 10)—Eddie Boyd, 2nd George Lyon.  
50-Yard Dash (girls under 10)—Miss Drummond, 2nd Miss Baint.  
Bale Vault—H. E. Lyon, 2nd W. Turner.  
Fat Men's Race—L. W. Thompson (weight 240), 2nd L. H. Putnam (weight 282½ in clean feet).

Page-and-Spoon Race—Miss Drummond, 2nd Miss Hilda Doubt.  
100-Yard Dash—H. E. Lyon, 2nd D. Lewis.  
Saddle Race (50 yards)—Arthur Williams, 2nd L. Lewis.  
Three-Legged Race—Williams and Smith, 2nd Beard and Patterson.  
Blairmore defeated both Lethbridge and Coleman in football, all the goal being shot by Bigelow.

The Coleman brass band of twelve pieces rendered good music throughout the day.

On the grounds were a number of refreshment booths which assisted materially to fill the requirements of all present. A large dancing pavilion was in readiness on the grounds. This was kept busy by the lovers of the terpsichorean art.

The committee in charge deserve great credit for the successful issue of Blairmore's Red-Letter-Day. Not a hitch occurred anywhere in the day's proceedings, and if anyone failed to acquire their share of pleasure and enjoyment the committees are not to blame.

This is the second successful picnic held in Blairmore this season, and they form but the initial of a long list of picnics and excursions which are sure to be aburred by the attractiveness of Blairmore for such events.

## Officers of Crows' Nest Encampment Installed

C. Lowther, D.D.G.P., and G.W. Patterson, P.C.P., of Lethbridge, came to town on Wednesday night and installed the officers of Crows' Nest Encampment No. 8. The new officers are:

Junior Past Chief Patriarch, F. W. Doubt.  
Chief Patriarch, W. J. Barlett.  
High Priest, R. C. Green.  
Senior Warden, H. B. Berry.  
Recording Scribe, A. Morency.  
Financial Scribe, H. G. Bigelow.  
Treasurer, J. Montalbetti.  
Junior Warden, F. E. Hinds.

T. D. Bunce came over from Creston this week.

## Council Meeting On Monday Night

The adjourned meeting of the Blairmore council was held on Monday night, Mayor Lyon, councillors Drinn, Hinds, Sinclair, McLeod and Beebe being present.

A number of correspondences were received, which included letters from the Pacific Coast Pipe Co., W. M. Campbell, Forest City Paving Co., H. T. Lloyd, C. H. Burgess & Co.

W. M. Campbell on behalf of W. A. Macleod, informed the town council that unless payment is immediately made steps would be taken to recover the amount due W. A. Macleod for lots agreed upon by the town last year. The lots in question were chosen last year by the ratepayers as the most desirable location for the fire hall and municipal offices. The secretary was instructed to write Mr. Campbell, informing him that as soon as debentures were marketed the lots would be paid for.

H. T. Lloyd, who had been requested to examine the water supply available for power to generate a lighting system for the town, reported that the amount of pressure at the present intake at the dam was insufficient and that in order to generate a current sufficient to light the town of Blairmore it would be necessary to secure a greater pressure. Mr. Lloyd gave an estimate of the probable cost of such a system as was necessary, also of the cost of erecting new pole lines.

A report from the chief of police for the six months ending June 30th was read and received.

The following accounts were approved: C.P.R. for lettergrams \$3.40, W. A. Beebe for rent \$80.00, Blairmore Hardware Co. \$4.50, W. J. Barlett \$12.00.

Beebe-Drain—That By-Law No. 25 be given its first reading. Carried.

Hinds-McLeod—That By-Law No. 26 be given its second reading. Carried.

Sinclair-Drain—That By-Law No. 26 be given its third reading. Carried.

By-Law No. 26, to provide for the borrowing of the sum of \$250.00 to meet the requirements of the town until the taxes are collectable was finally passed.

On motion By-Law No. 21, was read a second and third time. This is a by-law governing the waterworks system. No other business the meeting adjourned at 9.45.

## At the Sanatorium

Among the week-end guests at Sanatorium were H. A. Howard and wife, H. J. McCurry, W. F. McNeil, H. G. Berry, and E. S. Davis, Calgary; J. Hudson, W. L. Linton, A. K. Lavan, Vancouver; J. E. Smith, Fernie; J. E. Gillis, Blairmore; C. K. Cavan, Toronto; O. J. Kaiser, D. Normandy, E. Oakes, F. Cameron, Lethbridge; Miss Freese, D. Dunlop, Ottawa; Mr. and Mrs. J. M. Windsor, Bellevue; John J. Burns, Pittsburg, Pa.; C. B. Baker, Des Moines, Ia.

## SOWING HIS WILD OATS REAPING A HARVEST OF SORROW

How many young men  
can look back on their  
early life and regret their  
misdeeds. "Sowing their  
wild oats" in various ways.  
Excesses, violation of sa-  
turity's laws, "wine, women  
and song"—all have their  
victims. What have re-  
formed but what about the  
seed you have sown—what  
about the harvest? Don't  
trust to luck. If you are  
at present within the  
clutches of any secret habit  
which is sapping your life  
by degrees, if you are suf-  
fering from the results of  
past indiscretions, if your  
blood has been tainted from  
any private disease and you  
dare not marry; if you are married and live in dread of symptoms breaking  
out and exposing your past; if you are suffering as the result of a misap-  
plied life—**DRS. K. & K. ARE YOUR REFUGE.** Lay your case before  
them confidentially and they will tell you honestly if you are curable.

### Summer School At Pincher Creek

Arrangements have been about  
completed for the big summer  
school which opens here on August  
12 under the auspices of the Meth-  
dist church of Alberta. Formerly  
there were three of these schools  
held in the province each summer,  
but this year the number has been  
cut down to two. Notwithstand-  
ing this curtailment, however, the  
officers of the local church have  
been able to secure one of the  
schools for Pincher Creek.

These summer schools mean a  
good deal to the communities in  
which they are held. They are  
widely advertised all over the  
country, and it is quite safe to say  
that Pincher Creek will receive  
more good publicity through the  
summer school than it will from  
any other source this year.

A number of the best speakers in  
the country will be present at this  
school, including J. P. Westman  
who delighted a Pincher creek au-  
dience a short time ago with his  
illustrated lecture. The mornings  
will be given up to the various  
branches of religious study, while  
the afternoons will be occupied  
with organized sport of various  
kinds, and the evenings will be  
taken up with lectures and other  
methods of entertainment.

While this school is under the  
jurisdiction of the Methodist  
church, it is nevertheless non-  
denominational and any person  
may attend and go into camp.

### Department to Cope With Serious Problem

The Financial conditions of the  
last few months have made it nec-  
essary for the Department of Neg-  
lected Children to do an extremely  
large amount of work. The work  
has been so extensive that it has  
almost been impossible to cope  
with the situation. During the  
past three months something over  
one hundred children have been  
placed in foster homes and some-  
thing over six hundred cases have  
been dealt with.

The brunt of the effect of de-  
pression naturally comes to those  
who are employed on intermittent  
work at low wages with the result  
that there is more or less of a  
tendency to family desertion dur-  
ing these times than during more  
prosperous times of plenty of work and  
good wages.

The problem of family desertion  
is a serious one and has to be  
handled in a delicate way, as in  
many cases the mother and child-  
ren deserted are anxious that no  
publicity shall be given to the  
family desertion and thereby many  
men escape punishment, which is  
really their due.

Men who are guilty of family  
desertion are liable for prosecution  
under the criminal code and can  
be sent to jail for long terms and  
it is the intention of the Alberta  
authorities to prosecute to the limit  
those who disregard their respon-  
sibilities in this connection.

It is impossible to expect any  
good to come from the cowardly  
action of family desertion. In  
many cases if a little sternness  
is used the results will be satisfac-  
tory in the long run, because it  
will be possible by a certain  
amount of sacrifice to tide over  
the situation and in the event of  
conditions coming right again the  
home will be held together and  
the man have the family rights  
which he has obligated himself to  
by marriage and the rearing of a  
family.

The cowardly action of family  
desertion has not yet got for any

man a large degree of satisfaction.  
A helpless child thrown on a com-  
munity, in many cases, is possibly  
better off without a father than  
with the stamp of man who is will-  
ing to desert his responsibility,  
as a father, but in the majority of  
cases the men are stampeded by  
circumstances and do not have  
enough grit to fight the situation  
through. This is an unfortunate  
condition of affairs and it is one  
which can only be remedied by the  
individuals looking at the matter  
fairly and squarely and recogniz-  
ing their responsibilities.

Wives and families as a general  
rule are more than willing to face  
the circumstances to which the  
bread winner is exposed and to do  
more than their share to keep up  
the family. It is a cowardly ac-  
tion to desert a wife and leave on  
her hands a number of children  
who are helpless and dependent.

The circumstances surrounding  
the cases of desertion which have  
come to the attention of this De-  
partment during the last few  
months as a general rule are inex-  
cusable. Men who have contracted  
extravagant habits in good times  
find it is not always possible to  
stop these habits and have possibly  
run into debt and finally skip the  
country because they have become  
afraid of the consequences. If a  
man is honest and fair there is no  
reason why he should not go to his  
creditors with a fair statement of  
his condition and have the matter  
properly adjusted.

While the Attorney General's  
Department is more than willing  
to assume any responsibilities in  
cases of actual need and child neg-  
lect, they are determined that the  
matter of family desertion must  
stop and examples be made of  
those who are playing the part of  
the coward and trying by unfair  
means to throw the responsibility  
of their families upon the shoulders  
of other people.

### "Especially," and Then Some!

Oddfellows will enjoy the  
cooling mountain breezes at  
Blairmore on Thursday. Who  
wouldn't be an Oddfellow this  
weather, especially if they had  
a picnic every day—Lethbridge  
Herald.

### James Connice Dies in Arizona

Port Arthur, July 25.—James Connice,  
ex-M.P., died at Prescott, Arizona, to-  
day, which was the culmination of an  
illness of five years. The illness became  
serious after the session in 1910. Con-  
necy to the advice of his physician be-  
came a candidate in the Thunder Bay and  
Rainy River riding in the reciprocity  
campaign of 1911. The election was de-  
ferred and Mr. Connice, after the defeat  
of the Laurier government was certain  
victory from the contest. He left then  
in search of health, going first to Saranac  
Lake, N. Y., and then to Arizona. His  
death was not expected at the present  
time. Mrs. Connice and Miss Connice  
are now on their way to Arizona.

Mr. Connice was a very prominent  
man of affairs and public man. He was  
born in Sydney, Ont., on October 13,  
1848. He received his early training at  
Owen Sound and interested himself early  
in life in lumbering, mining and con-  
tracting. He built several miles of the  
C.P.R. and the Atlantic Central railway,  
and later the Canadian Northern rail-  
way. He was a strong advocate of New  
Ontario. He was the first president of  
the Ontario mining institute in 1894. He  
was later mayor of Port Arthur and oc-  
cupied many public positions in the city  
of Port Arthur where he spent most of  
his life.

But he was best known as a public  
man. He was elected to the Ontario  
legislature in 1885, 1886, 1890, 1894.  
He resigned to contest the dominion riding  
of Nipissing in 1896, but was defeated.  
After the election it was found that his  
resignation was not technically effective  
and he was still a member of the provin-  
cial legislature. He was re-elected in  
1898 and 1902. He resigned in 1904 and  
was elected to the Dominion house as  
member for Thunder Bay and Rainy  
River.

He served in the Eighth New York  
Cavalry under General Custer in the  
American war. He was married in 1874  
to Emily Florence Cox of Montreal. His  
family includes a wife who survives  
him, Mrs. William, Mrs. M. J. Kelly,  
Miss Louise Connice and Arthur B. Con-  
necy. He was a Liberal and a Roman  
Catholic.

Mr. Connice was a very forceful man.

### Pleasure Seekers From Macleod

A party of pleasure seekers  
motored to the Rocky Mountain  
Sanatorium for the week end, Sun-  
day. The party was composed of  
Mr. and Mrs. T. Dickson, Mr.  
and Mrs. G. H. Aldham and son,  
Mr. and Mrs. E. Foster Brown, Miss  
Cody, Miss Brown, Mr. and Mrs.  
A. E. Gray, Mr. and Mrs. A. T.  
Leather, Miss Matheson, Dr. and  
Mrs. Bruce, Mr. and Mrs. A. D.  
Ferguson and son. They left for  
the return trip to Macleod on Sun-  
day evening. The party has made  
several trips to the Sanatorium,  
and always seemed pleased with  
the resort and the scenery and  
climate hereabouts.

Anglican service will be held as  
usual in the Oddfellows' hall on  
Sunday evening.

W. T. and Mrs. Eddy, of Lund-  
breck, took in the Oddfellows' picnic  
yesterday.

A man was noticed entering the  
Oddfellows' hall through a front  
window on Tuesday evening, while  
a re-convicted, who is well known,  
held the ladder. After the appre-  
hension of a vest an exit was made  
through the back door. The matter  
will be hushed up.

A well known Blairmore grocer,  
last week, in making preparations for  
the entertainment of a guest,  
placed a couple of bottles of "Al-  
berta's Pride" in the wine cupboard.  
Several hours afterward when the  
visitor arrived and the grocer pro-  
duced the refreshments it was dis-  
covered that the bottles contained  
poison water. Two little boys, who  
noticed the goods being placed away,  
were responsible for the disappoint-  
ment. Naughty boy!

Though not an eloquent speaker, he was  
a strong, energetic speaker with a strik-  
ing personality.

### Sanatorium Crib- bage League

The big summer tournament  
which has been in progress between  
the guests of the Sanatorium, is  
creating considerable interest of  
late, and as a result the tennis  
courts and other pleasure resorts  
in that locality have become literally  
depopulated.

Those taking in the tournament  
are Messrs. A. C. Beach, T. C. Boud-  
reau, P. Carruthers, S. G. Lake, H.  
Moore, I. Ryan, T. Smith, N. Spel-  
den, H. N. West and Mrs. K. W. E.

Four hundred games have to be  
played. At the end of the first  
week, Carruthers had leading per-  
centage and bids fair to be the  
winner. Excitement is running  
high, especially around the bulle-  
tin board, where the score man has  
to use a cut-o-nine-fair in order to  
keep intensely interested parties  
back.

### CAUSES OF STOMACH TROUBLES

Solitary habits, lack of out door  
exercise, insufficient masti-  
tion of food, constipation, a torpid liver, wor-  
king at a desk, overeating, partak-  
ing of food and drink not suited to  
your age and occupation. Correct  
your habits and take Chamberlain's  
Tablets and you will soon be well  
again. For sale by all dealers.

Rev. J. C. Syme will deliver his  
lecture entitled "Unpopular  
Church" at the Central Baptist  
church on Monday night next.  
Everybody welcome. A collection  
will be taken.

A bold attempt at burglary was  
made at the bed-room of F. E. Hinde  
at Blairmore last week. A young man  
was attempting to enter through a  
front door when the quaking of the  
hinges woke the occupants. A mil-  
lions-minute pace was a compulsion  
by the bold chump following a roar and  
rush from the inside.

A GOOD INVESTMENT

W. D. Magill, a well known mer-  
chant of Whittemout, Wis., bought  
a stock of Chamberlain's medicine so  
as to be able to supply them to his  
customers. After receiving them he  
was himself taken sick and says that  
one small bottle of Chamberlain's  
Cough, Cholera and Diarrhoea Remedy  
was worth more to him than the cost  
of his own sick of these medicines.  
For sale by all dealers.

One of the largest single areas  
newly reserved was an addition of  
two thousand, six hundred and eight-  
ty-four square miles to the Rocky  
Mountains Forest Reserve. Ever  
since the Rocky Mountains Park in  
the neighborhood of Banff, was cre-  
ated by the Government in 1885, the  
reservation of the non-agricultural  
lands on the east slope and foothills  
of the Rockies has been gradually  
extended, until now the reserved area  
stretches from the international  
boundary line, north west fully five  
hundred miles. The purpose of this  
reservation policy in this case has  
been two fold. Not only will this  
area under forest management pro-  
duce a perpetual yield of timber to  
supply the needs of the settlers in  
Alberta and Saskatchewan, but the  
forests will act as reservoirs to regu-  
late and maintain an even flow of  
water in the great rivers of the  
plain which have their source on the  
western slopes. The Dominion Govern-  
ment is profiting by the experience  
of the United States, where in 1911,  
the Weeks Bill was passed, making  
provision for the expenditure of nine-  
teen million dollars for the require-  
ment of land located on the head  
waters of navigable streams, which  
lands had previously been sold to  
private individuals, stripped of the  
forest growth by axe and fire, and  
are now being bought back by the  
United States Government to be  
reforested, in order to put a stop to  
the floods and erosion on the rivers  
having their source in these denuded  
areas.

As far back as 1896, Mr. J. S. Den-  
ny, U. S. T. S. Chief Inspector of Sur-  
veys and Irrigation in Canada,  
speaking of the forests on the East  
slope and foothills of the Rockies,  
reported, "With the destruction of  
these forests will come the sudden  
frosts and rapid run off of the  
meltwater from this area. The per-  
manency of our water supply is there-  
fore largely dependent upon the  
protection of the forests at present  
covering our watershed and their  
protection can only be secured by  
taking steps to prevent the devastat-  
ing fires which annually sweep over  
large portions of the area."

The Rocky Mountains Forest  
Reserve contains the head waters of  
five great rivers, the Missouri, the  
North Saskatchewan, the South Sas-  
katchewan, the Athabasca and the  
Peace. All this water descends from  
an elevation of about ten thousand  
feet in the mountains to an elevation  
of about three thousand feet in the  
foothills, and in this rapid drop the  
forested slopes play an immensely  
important part in preventing freshets  
and erosion. Also by regulating the  
water flow, these forested areas make  
possible the irrigation of the millions  
of acres of arid land in Southern  
Alberta.

As to maintain the forest cover  
on this otherwise non-productive  
area, that the Rocky Mountains Forest  
Reserve was created. Only when set  
aside as a permanent Reserve, can  
the Dominion Government afford to  
make the costly improve-ments neces-  
sary for the effective regulation of  
forest fires. Only about ten per cent  
of the Reserve carries a stand of  
merchantable timber, the remaining  
ninety per cent being either barren  
land above timber line or covered  
with young growth, mostly of lodge-  
pole pine. If fires be kept out, this  
young growth will in a few years,  
attain merchantable size and be a

source of timber supply to the settlers  
westward from its border, where, for  
five hundred miles, there is absolute-  
ly no tree growth. It will also  
furnish mine props to the many coal-  
miners now being operated on the  
Reserve. It has been estimated by  
biological survey that over twenty-  
two and one half billion tons of  
coal exist in the Alberta coal fields,  
the mining of which will require over  
forty-five billion lineal feet of min-  
ing props, the product of nine million  
trees for sixty years. If the trees  
are not kept out this young growth  
will be destroyed, there will be no  
mature trees left to re-seed the burnt  
area and a vast barren will be the  
ultimate result.

There can be no question as to the  
adviseability of making these reserva-  
tions. The only possible criticism is  
that not enough care has been taken  
to exclude agricultural lands. But  
before any reserves have been creat-  
ed, thorough surveys of such areas  
have been made by technical Forest-  
ers who take Topography, soil, cli-  
mate, elevation and timber into  
consideration when determining the  
boundary of the Reserves. This has  
been the basis of determining the  
boundary of the new addition to the  
Rocky Mountains Reserve. In general  
it is found that an elevation of  
four thousand feet marks the extreme  
limit where it is possible to grow  
agricultural crops and above that, if  
the land is reserved, consisting mostly  
of a gradually rising succession of  
hills and washes. Wherever pos-  
sible, natural boundaries were select-  
ed to secure the better protection of  
the reserve from fire.

In some cases large tracts of  
land extend toward the extreme  
westward, and grazing will be per-  
mitted, under permit, on these  
areas. There are many such valleys  
in the Porcupine Hills, but the reser-  
vation will not interfere with grazing  
rights and will prevent the rapid  
destruction by fire and axe, of the  
spruce and fir Douglas firs, which origi-  
nally covered these high, steep  
slopes. Mr. E. J. McLaughlin, U. S. F.  
reports that where the timber will  
soon be cut off, especially on the eastern  
side, leaving bare rocky hill sides.

Mr. McDougall, another technical  
Forester reports that "unless the  
fire can be effectively checked, the day  
is not far distant when the forest  
cover will have vanished completely  
from the Porcupine Hills." It is to  
prevent this and to provide for a  
permanent supply of timber as well  
as an evenness of water, that these  
new reservations have been made.

THE BEST MEDICINE IN THE WORLD

agricultural crops and above that, if  
the land is reserved, consisting mostly  
of a gradually rising succession of  
hills and washes. Wherever pos-  
sible, natural boundaries were select-  
ed to secure the better protection of  
the reserve from fire.

In some cases large tracts of  
land extend toward the extreme  
westward, and grazing will be per-  
mitted, under permit, on these  
areas. There are many such valleys  
in the Porcupine Hills, but the reser-  
vation will not interfere with grazing  
rights and will prevent the rapid  
destruction by fire and axe, of the  
spruce and fir Douglas firs, which origi-  
nally covered these high, steep  
slopes. Mr. E. J. McLaughlin, U. S. F.  
reports that where the timber will  
soon be cut off, especially on the eastern  
side, leaving bare rocky hill sides.

Mr. McDougall, another technical  
Forester reports that "unless the  
fire can be effectively checked, the day  
is not far distant when the forest  
cover will have vanished completely  
from the Porcupine Hills." It is to  
prevent this and to provide for a  
permanent supply of timber as well  
as an evenness of water, that these  
new reservations have been made.

THE BEST MEDICINE IN THE WORLD

My little girl had dysentery  
very bad. I thought she would die.  
Chamberlain's Cough, Cholera and  
Diarrhoea Remedy cured her, and I  
can truthfully say that I think it  
is the best medicine in the world.  
Wm. McLaughlin, U.S. F., Clare,  
Mich. For sale by all dealers.

As far back as 1896, Mr. J. S. Den-  
ny, U. S. T. S. Chief Inspector of Sur-  
veys and Irrigation in Canada,  
speaking of the forests on the East  
slope and foothills of the Rockies,  
reported, "With the destruction of  
these forests will come the sudden  
frosts and rapid run off of the  
meltwater from this area. The per-  
manency of our water supply is there-  
fore largely dependent upon the  
protection of the forests at present  
covering our watershed and their  
protection can only be secured by  
taking steps to prevent the devastat-  
ing fires which annually sweep over  
large portions of the area."

The Rocky Mountains Forest  
Reserve contains the head waters of  
five great rivers, the Missouri, the  
North Saskatchewan, the South Sas-  
katchewan, the Athabasca and the  
Peace. All this water descends from  
an elevation of about ten thousand  
feet in the mountains to an elevation  
of about three thousand feet in the  
foothills, and in this rapid drop the  
forested slopes play an immensely  
important part in preventing freshets  
and erosion. Also by regulating the  
water flow, these forested areas make  
possible the irrigation of the millions  
of acres of arid land in Southern  
Alberta.

As to maintain the forest cover  
on this otherwise non-productive  
area, that the Rocky Mountains Forest  
Reserve was created. Only when set  
aside as a permanent Reserve, can  
the Dominion Government afford to  
make the costly improve-ments neces-  
sary for the effective regulation of  
forest fires. Only about ten per cent  
of the Reserve carries a stand of  
merchantable timber, the remaining  
ninety per cent being either barren  
land above timber line or covered  
with young growth, mostly of lodge-  
pole pine. If fires be kept out, this  
young growth will in a few years,  
attain merchantable size and be a

source of timber supply to the settlers  
westward from its border, where, for  
five hundred miles, there is absolute-  
ly no tree growth. It will also  
furnish mine props to the many coal-  
miners now being operated on the  
Reserve. It has been estimated by  
biological survey that over twenty-  
two and one half billion tons of  
coal exist in the Alberta coal fields,  
the mining of which will require over  
forty-five billion lineal feet of min-  
ing props, the product of nine million  
trees for sixty years. If the trees  
are not kept out this young growth  
will be destroyed, there will be no  
mature trees left to re-seed the burnt  
area and a vast barren will be the  
ultimate result.

There can be no question as to the  
adviseability of making these reserva-  
tions. The only possible criticism is  
that not enough care has been taken  
to exclude agricultural lands. But  
before any reserves have been creat-  
ed, thorough surveys of such areas  
have been made by technical Forest-  
ers who take Topography, soil, cli-  
mate, elevation and timber into  
consideration when determining the  
boundary of the Reserves. This has  
been the basis of determining the  
boundary of the new addition to the  
Rocky Mountains Reserve. In general  
it is found that an elevation of  
four thousand feet marks the extreme  
limit where it is possible to grow  
agricultural crops and above that, if  
the land is reserved, consisting mostly  
of a gradually rising succession of  
hills and washes. Wherever pos-  
sible, natural boundaries were select-  
ed to secure the better protection of  
the reserve from fire.

In some cases large tracts of  
land extend toward the extreme  
westward, and grazing will be per-  
mitted, under permit, on these  
areas. There are many such valleys  
in the Porcupine Hills, but the reser-  
vation will not interfere with grazing  
rights and will prevent the rapid  
destruction by fire and axe, of the  
spruce and fir Douglas firs, which origi-  
nally covered these high, steep  
slopes. Mr. E. J. McLaughlin, U. S. F.  
reports that where the timber will  
soon be cut off, especially on the eastern  
side,

## HENRY A USEFUL SON-IN-LAW.

Is Given Opportunity to Reply Kind-  
ness of Wife's Father.

"HENRY," said his father-in-law as he called his daughter's spouse into the library and locked the door, "you have lived with me now for over two years."

"Yes, father."

"In all your little family quarrels I have always taken your part and decided in your favor."

"Always, sir."

"I have even paid some of your bills."

"A good many, father."

"And in every way helped you to get along."

"You have been very kind, sir."

"I have tried to be, my boy, and I hope you appreciate it."

"I do, sir."

"Then the small favor I am about to ask of you will not be granted?"

"Most certainly, sir."

"I wish you would go to tell your mother-in-law that those tickets for the French dance which she picked up in my room this morning must have accidentally been left in your pocket, and will call it square."

Young American Legion.

"Dad," the youngster asked, "does it cost much to keep a lion?"

"It does, my son. A spider would make a good meal for a lion, wouldn't it, dad?"

"Yes."

"And a fox would be enough for the wolf, wouldn't it, dad?"

"I suppose so. Go on and play."

"A fox would be satisfied with a hawk, and a sparrow would satisfy a hawk—eh, dad?"

"I'm! If you don't go away?"

"And the spider would make a meal for a sparrow?"

"Yes, yes! Now—"

"Wait a minute, dad. Now were you coming to it. A spider would be satisfied with a fly, wouldn't it?"

"Yes, my son."

"And a drop of molasses would be enough for a fly, wouldn't it, dad?"

"Well, supposing it would?"

"Yes, that's just it, dad. Now, what I want you to tell me is this: Could a man keep a lion for a year with a quart of molasses?"

"And then the sound of a falling sparrow would be enough for a lion, wouldn't it, dad?"

Patience.

"I'm—eh—eh—," said the gentleman with the tawny moustache, making those preparatory sounds by which the British or the American of his kind usually speaks the words of his intention to speak, "just little piece this Canadian and all that sort of rot. Kindly feelings toward all your colonials, too, quite so. But have you a tin of soap or an tin where a chap can get a pint of ale and a fanny heated?"

"The Canadian scratched his head."

"Well, now, I don't know. Up to the Washington hotel, though, you can get some Chicago ham and Milwaukee beer and New York crackers. I'm from Iowa myself—just moved north last winter—but I'm glad to see you, even if you are English. Who's your clerk in your country now?"

A Rascaler.

"I suppose you tried to save every penny when you started in business?"

"I did more than that," replied Mr. Cassius Cheek. "I rescued a hat that other people were squandering."

Washington Star.

And Marriage a Britishish.

Jack—Swearing of course, what kind of a ship is contraband?

Tom—It's a transport, my boy—San Francisco Chronicle.

## THINGS THAT SHE KNEW.

SHE knew she was wrong when that  
curse came that night.

And heartlessly sent him away.

She knew that his conduct was very  
feetly right.

But she scorned everything that he  
said.

She knew that the fault was all hers,  
and she knew.

That she meant not a word that she  
said.

She knew that the charges she made were  
not true.

And she knew that her love wasn't dead.

She knew when she told him that she  
never loved.

That never again did she want him to  
come.

That she didn't mean it at all.

And she knew when he said that he'd  
never return.

Accidentally up his hat and his cane  
and angrily left that morning at  
seven.

And long to be with him again.

She knew—yes, she knew she was wrong  
him then.

That virgin prairie, which he had  
been the roaming ground of the  
buffalo, showed an expanse of 4,600  
acres broken up by the plow.

The plows were then replaced by  
six dicks, attached to each engine in  
such a manner as to give the surface  
ed so double stroke, thus pulverizing  
it well and putting the sod in fine  
condition for seeding.

Over 4,000 acres were treated in this  
manner before the close of the season.

Since that time the progress of the  
work has been steady, and the Welton  
farm is now one of the show farms of  
Saskatchewan for mechanical equipment.

English Reserve.

An informal address was delivered  
by a member of the Anglo-American  
club at one of the club's most  
popular clubs on the text: Is the  
Britisher losing his habitual re-

servation? The speaker has been in  
years in London and the provinces,  
and claims that a complete change has  
come over the Englishman during that  
time, for instead of being the shy  
of his fellow men, he has got so that  
he is almost a social lion.

The Englishman has changed, the English-  
man no longer stops at home. The  
restaurant habit is common. The  
affinity so that he not only does  
even take to the table, but he  
would like to do his best to find a  
partner.

"What's the matter?"

"He's been slandering me. He says  
that I beat him out of \$5 in a poker  
game."

"Not at all. I heard the remark my-  
self."

"What did he say?"

"He said that you beat him out of  
\$5,000 in a wheat deal."

"Oh, well, then, I suppose it is all  
right. I hardly thought he was the  
kind of man to go around telling stories  
that reflected on my character."

Life.

Strange Spelling.

He was known as Chetwack George,  
and through careless industry he had  
come to that position where he could  
open a garage in San Antonio, Tex.

Over the broad door of his establish-  
ment, George had a sign consisting of  
the one word, "Garage."

One morning an old negro woman  
came down the street which was orna-  
mented with Chetwack's automobile  
mobile emporium. She stopped and  
looked at the sign a moment quiescently.  
Then she chuckled:

"'G-a-r-a-g-e'—that's the way I've seen to  
spell 'George.'—Popular Magazine.

Cause For Sprinkling.

One day while riding his launchroom  
in a small district school I heard the  
teacher telling the pupils stories about  
various kinds of animals and their  
methods of making. In illustrating  
she said: "We get our shoes from the  
skin of the cow. Hair combs and other  
every article are made from the  
horns of the cow."

Deliberate Downfall—Hey, what's  
hurry? Try to beat Weston's record  
now.

Successful Stevens—Now, don't  
hear! I'm bound for the flood dis-  
tricts. Thousands of barrels of whisky  
have been washed away, and I'm try-  
ing to beat 'em to New Orleans—Chi-  
cago News.

Character.

We may judge a man's character  
by what he loves, what pleases him.  
If a man manifests a delight in low,  
sordid objects, the vulgar song and  
debauching language, the misfortune  
of his fellows or animals, we may at  
once determine the complexion of his  
character.

On the contrary, if he loves purity,  
decent, truth—if virtuous pursuits  
engage his heart and demand his  
affections—we are satisfied he is an  
upright man. When we see a young  
man fond of the club and making a  
top of himself, it is a sure sign that  
he thinks the world consists of outside  
show and ostentation, and he is cer-  
tain to make an unstable man without  
true affection or friendship, fond  
of change and excitement, and he is  
wary of those objects and pursuits  
which for a time gave him pleasure.

No surgical operation is necessary  
in removing corns if Holloway's Corn  
Cure Be used.

A very large and muscular Irish  
woman, who was married here, was  
up in the police court on the charge  
of being drunk and making a  
wreck of the worst dissipated man  
the judge had ever seen. His arm was  
in a sling, his face was black and  
his eyes were blackened, and he seemed  
scarcely able to stand. The judge  
said that the family, and even the  
wreck could beat you as you mean  
stated.

Her honor, he wasn't a physical  
wreck until he tried to beat me.

## AN EXAMPLE FOR BOXERS

Trainers

Training was the average boxer is  
a joke. In fact they seldom do any  
real training. Even when they are  
in a fight at it they do a little  
running in the morning, a little  
loping in the afternoon. Most of  
the so-called training, however, con-  
sists in loitering in the saloon quar-  
ters and more time is spent in undress-  
ing and dressing than in actual work.

One man who gets around in the  
fighters' gymnasium once in a while  
and a lot of talking and loitering  
with the other scrappers. But he  
did very little actual work, as a mat-  
ter of fact, just 11 minutes. That  
was just one minute more than four  
rounds in the ring.

They spend hours every day  
of their lives doing their stunts. They  
never miss a day, even in the  
winter when they are laying off, they  
draw air.

Men who do hard, aerobic work  
at afternoon and evening per-  
formances don't get the idea that en-  
ough work to keep in shape, but also  
do some training every morning just  
to keep in shape.

Many muscles practice four or  
five hours a day, and some for years.  
When this work is compared with  
the fighter's 11 minutes, the  
scrappers system seems a  
clinch.

The funniest thing, however, about  
the training of the modern boxer is  
the rubdown. Even the cheapest  
preliminary fighter nowadays has to  
get a massage treatment every time  
he goes to the gymnasium, no  
matter how little work he does. Most  
of the time he reads the idea that the  
rubbing will increase their fighting  
power, whereas it does nothing but  
increase their natural laziness.

**Monumental Crime**  
John Bright's voice was unequivocally for peace.  
He was walking once past the Crutcher monument in London with one of his sons, then a lad. Everyone knows that the word Crutcher is engraved on the monument, and the boy pointed to the monument, and to the word upon it, and asked:  
Father, what is that?  
That, said John Bright, pointing at no to the word, is a crime.

## SHE WAS HELPLESS FOR TWO YEARS

WHY MRS. BALDWIN RECOMMENDS DODD'S KIDNEY PILLS

She Could Find Nothing to Cure Her Rheumatic Tries Dodd's Kidney Pills.

St. Walburg, Sask. (Special).—I can truly recommend Dodd's Kidney Pills for any one suffering from rheumatism. These are the words of Mrs. W. A. Baldwin, a highly respected resident of this place. And Mrs. Baldwin gives her reasons. "I was nearly helpless with rheumatism for two years," she states. "I got medicine from the doctor, and tried several other remedies but nothing helped me. Then one of my neighbors advised me to try Dodd's Kidney Pills. I bought four boxes, and they helped almost from the first. I have used nearly two dozen boxes and am nearly cured."  
That rheumatism is one of the results of diseased kidneys is again shown in Mrs. Baldwin's case. She had headaches, stiffness of the joints and backache, her sleep was broken and unrefreshing, and she was always tired and nervous. Her limbs ached, and she was always thirsty. These are all symptoms of diseased kidneys. When she cured her kidneys with Dodd's Kidney Pills, the symptoms vanished, and so did the rheumatism.

### Wise Boy

Does—You told me an untruth yesterday when you said you wanted to get away to go to a funeral.  
Office Boy—Well, the home club lost, and it was almost as sad as a funeral.

### These Women

Everything my husband touches turns to gold.  
Then you didn't really bleach your hair, after all?

The Johnsons, according to a recent story, had an old hen who insisted upon neglecting her comfortable nest to lay a daily egg in the coal cellar. I can't think, fretted Mrs. Johnson, as she and her mother-in-law, together hunted for that particular egg, why this one hen insists upon using the coal bin.  
Why, that's easy, mother, exclaimed Joe, in astonishment. I suppose she's seen the hen. Now is the time to lay in your coal.

A bomb exploded at an observatory! Evidently a desire to make them see stars.

## Please the Home Folks By serving Post Toasties

They are among the good things to eat, but not in the cook book, because they require no cooking.

Post Toasties are always crisp and appetizing—ready to eat direct from the package. You save heaps of time and avoid hot work in the kitchen.

Some rich cream—sugar if you want it—or cool fruit juice, with these fluffy bits of corn and you have a dish that is fascinating for any meal of the day.

Post Toasties are sold by grocers everywhere.

Canadian Postum Cereal Company, Ltd., Windsor, Ont.

**The One in Command**  
Who's that impressive looking man over yonder?  
That's Mr. Peckham. He's a remarkable circumlocutionist, and they do say that he commands a very large salary.  
How does she earn it?  
She doesn't earn it. Her husband earns it and so she commands it.

In the lobby of a Washington hotel the other evening they were talking about the bill for the Representative Koenig cited a case.  
"Some time since, according to the representative, a man fell into an open coal hole, sued for damages and was awarded a substantial amount. When he received a bill from his lawyer, however, he was stunned again, and as soon as he could get into his house, he hastened to see him."

"Your bill is outrageous!" exclaimed the client to the local lawyer. "It is more than three-fourths of the amount that I recovered."  
Koenig true, was the calm response of the lawyer, but you mustn't forget that I furnished the skill and legal knowledge for the case.  
Yes, excitedly cried the client, but I furnished the case.  
Oh, as far as that goes, was the scornful reply of the lawyer, anybody can fall down a coal hole!

The day was warm, the children restless, the teachers impatient. One curly haired boy was moving his feet faster with chewing gum than his brain had ever known to work. His feet were in the aisle. A smile was on the face of more than one pupil when the teacher said:  
Take that gum out of your mouth and put your feet in.

## AFTER EFFECT OF FEVERS.

Banished Through the Use of Dr. Williams' Pink Pills.

Following wasting disease, such as fever, many people find it difficult to regain their former strength. They become breathless and tired out, and the least exertion, their appetite is feeble and they often feel as though death was staring them in the face. The trouble lies with the blood which has not returned to its normal condition and is lacking in the red corpuscles which, which good health is impossible. It is at a time like this that Dr. Williams' Pink Pills prove of the most valuable service. Every dose helps to make new, rich, red blood which means health and vitality.  
Theodore Polley, Albert, Ont., says: "Following an attack of typhoid fever I was left in a very weak and debilitated condition. The smallest exertion left me worn and tired out, and I was hardly able to get around, naturally felt dependent. I decided to try Dr. Williams' Pink Pills, and they proved of the greatest benefit to me. I am now as well and strong as ever, and can do all my own work. I feel that I owe my recovery to these pills."  
It goes without saying that there is much to be said, therefore, that I cannot say too much in praise of Dr. Williams' Pink Pills.  
If you are suffering from the after effects of fever, in grippe or acute disease, you should begin to get new strength to-day through the tonic treatment with Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box, six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

The angry citizen puffed into the office of the city editor.  
See here, sir, he yelled, what do you mean by publishing my resignation from my political office in this way?  
You gave the story out yourself, didn't you? asked the editor.  
Of course I did, replied the angry citizen. But you fool paper prints it under the head of Public Improvements.

He thought he was a connoisseur, and he was lamenting the decadence of art.  
Look, he said, at the great Italian school of painters. Look even at the old Greeks! Why, Zerkus painted grapes so naturally that birds came to peck at them.  
He did, he said, a hearer.  
That's nothing. I've got a friend who paints a mouse on his knee to keep him from biting.

John Paton had lost his wife and on the morning of the funeral he called on Jessie Haxthorn, a former sweet heart, and asked her to marry him.  
Oh, for shame, John, says she, to be thinking of marriage and yet wife so buried, gas said 'wif' you.

On reflection she thought she had been too hasty. So she cleaned her hands, after filling the potatoes, and said to the doctor:  
I am thinking I was gay and hasty this morning, and now I think I'll accept your offer.

Diana Faith, Jesse, the corpse's cousin has taken me.

The lumber industry on the Pacific northwest employs 250,000 men.

## YOUR WIFE WILL

appreciate it when you bring home a case of SNAP. For cleaning her hands, after filling the potatoes, and said to the doctor:  
I am thinking I was gay and hasty this morning, and now I think I'll accept your offer.

First Footbath—Woe's the matter Jimmy? You look scared.  
Second Footbath—Played out! I should think I am. Just been giving two policemen a shave.

Hilda, seeing a grand daddy looking for the first time, said to her mother and said, Oh, mamma, come and see this funny bug. He's a pig on his whiskers.

## FARM WOODLOTS

### Rapid Increase in Value Through Timber Scarcity

With the increasing inaccessibility of the forests and the consequent high price of wood, the small wooded tracts common on the farms of eastern Canada are also increasing in economic value. They frequently furnish the farmer with a continuous source of fuel, fence-posts, rails, poles and structural timber.  
Unfortunately, according to the statistics, these wood-lots are frequently allowed to deteriorate through carelessness or lack of knowledge on the part of the farmer. He takes great care to farm his agricultural lands to the best advantage, but often fails to realize that by farming his wood-lot with the same care, he could get the same increase in productivity. Cattle and weeds are not turned in a wheat-field, yet in the woodlot the cattle range at will, and instead of removing the weed-trees the farmer allows them to increase in number, removing only the trees best suited to his purpose.

To save the farmer for himself, the Dominion Government has appointed a technical forester with headquarters at the Forestry Branch, Ottawa, whose principal duty is to answer all inquiries, and give free advice in these matters. If necessary, arrangements can be made for a personal inspection of woodland properties by this expert. No conditions are imposed on the owner of the woodlot, it being assumed that he who is anxious for advice will accept it when given. The expert looks over the stand, determines what species of trees are best suited to the soil and to the local market, shows how to improve the character of the crop and its rate of growth by proper thinning, and, if desired, gives advice regarding tree-planting, hardwood-coppicing, felling-methods and the most profitable use of the timber.  
Further information on this subject can be obtained by writing to the Forestry Branch, Ottawa.

Which Two?  
Do you see that handsome row of tall poplars on the Canadian shore standing apparently at equal distances apart? Ask a pleasantly-looking man a group of passengers on the Fort Erie ferry-boat at Buffalo.

The group nodded assent.  
Well, there's quite a story connected with those poplars. Some years ago there lived in a house in Buffalo, overlooking the river, a very wealthy banker, whose only daughter was beloved by young surveyor. The old man was inclined to question the professional skill of the young man, and he decided to put him to the test. He directed him to set out on the Buffalo shore a row of trees, two of which should be as far apart as any other two.  
The trial proved the lover's incompetency, and forthwith he was forbidden the house, and in despair he drove himself to the city.

The first and the last, said he, calmly, resuming his cigar and walking off with the air of a sage.

Diamond Cut Diamond

The gentle Hester stood on the door of his second-hand clothing emporium, a weaver of tears in his eyes. He reached his hand to his forehead, and said, confidentially: See that second-hand pair of trousers lower down on the other side?

Yes, I see.  
And that drab Newmarket coat?  
Well, I want that coat, but I ain't going to pay the dealer's price for it because I am too fly for that. Now, you're a Jew, and you can cut a little more off and make a bit yourself. He'll ask at least a quid for it. You buy the coat for half a quid, you make half a dollar. Is that all right?

Mr. Levi clutched the coins and darted down the road. Two minutes later he was back with the coveted coat.  
The old boy Mr. Mo! roared he was a clever man. Thought you'd pull it off. Cleared a bit yourself, shouldn't you?

Mr. Levi said dot me was a man shop and der price of der secret was only seven-and-sixpence. I think I am almost five shillings in order der deal!

A Paris cabman found a splendid tourist that had been lost in the city. He went at once to the Commissariat of Police.  
"Very good, my friend," said the latter, "your back is in a year and a day, and in the meantime, the tourist has not been claimed, it shall be yours."

**SHOE POLISH**

The only matches of the kind in Canada.  
The "rips" are positively harmless. You or yours, even a drunken bite or swallow them without danger.  
In two sizes—regular and pocket. Protect yourself by using nose tip. Eddy's new "Ses-qui"

Ask Your Dealer

**Coal Prices Rise**  
Nova Scotia and Cape Breton colliers are this year quoting for short tons of coal the same prices which last year applied to long tons. This is equivalent to raising prices precisely 12 per cent.

Four-year-old Donald lived near the carbon works, and liked to watch the men coming from their work as black as if they worked in the coal mine. One evening as he was waiting on the veranda for his black friends a green press passed the house with a baby in a carriage. Donald crawled upon a chair where he would have better view and then, all excited, called: Mamma, mamma, come quick and see the baby in carbon works baby.

A Dutchman was going to cross a bridge he was riding in a little cart drawn by a goat. The toll man came out and said:  
Here, you got to pay toll before you can pass this bridge.  
What to pay toll?  
Five cents to cross this bridge.

After an argument the Dutchman paid the 5 cents and went on. In the afternoon he came back again, only this time he had the goat sitting on the seat, and he was dragging the cart himself.

Out came the toll man and said: Here, you know you've got to pay 5 cents.  
The Dutchman shook his head, and pointing to the goat, said:  
Don't talk to me—ask the driver.

Reduced by Asthma—The constant strain of asthma brings the patient to a dreadful state of hopeless exhaustion. Early use should by all means be made of the famous Dr. J. D. Kellogg's Asthma Remedy, which does more than any other quick and surely on the air passages and brings blessed help and comfort. No home where asthma is present the least degree should be without this great remedy.

You drank too much punch at the reception yesterday.  
Who saw me drink too much punch?  
It wasn't necessary to total.  
When I came in you were holding an animated conversation with a plant lamp.

A Dutchman was relating his marvelous escape from drowning when thirteen of his companions were lost by the upsetting of a boat, and he alone was saved.  
And how did you escape this? asked one of his hearers.  
I did not go in, in the pole, was the Dutchman's placid answer.

Chicago is contemplating the installation of a \$50,000 high-pressure water system for fire purposes.

That house I have rented from you, said the dissatisfied tenant, is horribly (Cough). When I was sitting in the middle of the room, my hair blew all over my face. Can't you do something about it?

Don't you think, sir, replied the house agent, naively, it would be easier and cheaper for you to get your hair cut?

Little Willie—What is a lawyer, pa?  
Pa—A lawyer, my son, is a man who induces other men to strip for a fight and then runs off with their clothes.

Where are you going senator? You seem busy.  
I am busy. Got to take this package of soil over to the agricultural department to be assayed, then I must send some soil to one of my constituents, and send some more boards for a man who says he voted for me last fall.

After the enjoyment of wearing his first pair of trousers, Dr. Chase and of the family assisted his mother the following morning, when she said: Come, dear, let me dress you. The boy said: Oh, no mamma! Don't dress me, pants me.

BLAIRMORE ALBERTA

Thirteen additional instruments have arrived for the Coleman brass band. Coleman's band will soon have a close rival for the noted Lethbridge city band.

Sever members of the Blairmore football team played Hosmer on the local grounds on Saturday evening. The score was 4-1 in the visitors' favor.

### Local and General

J. E. Rice, of Calgary, came to town on Saturday.

H. J. Pozzi is erecting a stable on Eighth Avenue.

J. A. McDonald returned from the South Fork yesterday.

The local business establishments closed on Thursday afternoon.

A. McLeod paid a business visit to Macleod the early part of the week.

Mr. and Mrs. Everall came up from Lethbridge for the I. O. O. F. picnic.

Mr. McRae, the Macleod blacksmith, came up for Thursday's picnic.

Mrs. E. Eacott and children, of Coleman, took in the Oddfellows picnic.

The best dressed window in town on Thursday was that of the F. M. Thompson Co.

The Presbyterian mission hall was this week moved to a new site on Fifth Avenue.

J. Stafford, of Everall & Franks, Lethbridge took in the Oddfellows picnic yesterday.

Frank Cicardi has opened a grocery store on the ground floor of the Oddfellows hall.

Thompson's motto on Thursday was "We cater to Oddfellows, and nothing is too good for them."

A. W. Hoyer, manager of the Moose Jaw Syndicate, returned from Moose Jaw on Wednesday.

R. T. Spruille, J. Lackie, J. Stewart and T. Owen, of Corbin, B. C. were in town on Wednesday night.

A. Bowers and G. Cameron returned from the South Fork Sunday night with full baskets of trout.

William Simpson and Anson Chester Beach, of Frank, have been appointed Justices of the Peace.

The U. F. A. held a picnic at Coate's ranch, Cowley, on Saturday. A good programme of sports was carried out.

The camera men were busy on Thursday, and many fine pictures were taken of the town in her colors and of the procession.

There will be a special meeting of the Order of Owls on the night of Thursday, July 31st, when a full attendance is requested.

A. Neidig, of Lethbridge, came to town on Tuesday with a special carload of bunting and decorating materials for the 24th.

Rev. Dr. Ferguson, superintendent of Presbyterian missions, occupied the pulpit at the Presbyterian church on Sunday evening last.

Owing to a slight derailment of Sunday's west bound passenger train, near Lundbreck, the train did not reach here till 2.30 p. m.

Dr. J. Wright, dentist, will open permanent parlors at Taber, and would be pleased to attend to his Blairmore patrons from that point.

The body of Robert Paddon, son of J. B. Paddon, who was drowned near Edmonton recently, was recovered and given burial at Edmonton last week.

A. Bouchie, of Minneapolis, arrived at Bellevue this week. Mr. Bouchie has spent a few months in Vancouver and speaks very highly of the Pacific gateway.

Gene Crain, of the "Enterprise," land three two-pound trout on Wednesday near the Grand Falls. "Gene" says no bait can beat a stuffed cockroach skin.

A. P. Seale and A. S. Julian, organizers of the Order of Owls, came in from Hosmer on Saturday. They installed the officers of Bellevue lodge on Sunday night.

Rev. J. C. Sycamore, of First Baptist church, Calgary, will preach the anniversary sermon at the Central Baptist church on Sunday next. Mr. Sycamore is one of the most popular and interesting speakers of the Province.

### Happenings in and Around Bellevue

George Nobb spent Sunday in Fernie.

Harry Quinn has returned to the camp from Fernie.

Miss May Taylor, of Maple Leaf, is visiting in Calgary.

The Jones Bros. circus played at Bellevue on Tuesday.

Mr. David Davidson is erecting a story-and-a-half house.

Walter Mills has taken over one of the teams at No. 1 mine.

Mrs. D. Slack, of Fernie, is the guest of Mrs. Gilbert Cousins here.

Geo. Christie and Robert Cousins visited Crows' Nest on Sunday.

Mrs. Joseph Robinson has been visiting in Winnipeg for a few days.

T. M. Burnett went on a fishing excursion to the North Fork on Wednesday.

A big lunch, spent Sunday on the South Fork and brought home lots of trout.

Mrs. Stephenson and family arrived in the camp from Diamond City last week.

Mr. and Mrs. Archie Barry have moved up from Fernie and will locate here.

Harry Campbell has resigned his position as trainer for the local football aggregation.

Macdonald Link has returned to the camp from the north, and is working at No. 2 mine.

Mrs. Colin McGilvray, of Lethbridge, is the guest of Mrs. J. D. McDonald for a few days.

Peter McGovern and family have moved up from Michel and will occupy house No. 40.

The Misses McKechnie, of Calgary, are visiting here, the guests of Mr. and Mrs. E. W. Christie

We don't hear many boasts of the extraordinary features of Jones Bros' circus. It was the mildest form of imaginary freaks that has ever visited The Pass.

Mr. Brennan, of Macleod, was in town the early part of the week. Mr. Brennan is the well-known baker of the prairie city, and contemplates opening a bakery in The Metropolis.

The Fairmont hotel at Maple Leaf was officially opened on Monday night. About two hundred people were in attendance, and dancing formed a prominent feature in the programme.

A resident of Beard's Camp appeared before Justice Gresham on Tuesday to answer to the charge of being drunk and disorderly on Monday night. For displaying his roadvian and desire for pugilism the gay boy was fined \$10 and cost.

In the eighth round of a scheduled fifteen-round bout between Freddie Welsh, the English lightweight champion, and Martin Murphy, champion of the western States, which took place at Fernie on Tuesday night, Murphy took the count.

Two marriages were solemnized by Rev. W. T. Young at Frank on Saturday last. One was that of Karl Pokorney to Rosa Cieulka, which took place at the home of Frank Pokorney; the other was Theophile Pirlot to Marie Louise Coblent. All the parties belonged to Frank.

F. M. Thompson's delivery horse took fright on Tuesday while about to be unharnessed. Coming up Fifth Avenue the animal struck Photographer Brownell, throwing him to the ground and injuring his legs and shoulder. On Victoria Street the runaway outfit collided with the standing wagon of J. F. Lank, where its wagon was left entangled minus a shaft. Mr. Lank received a scare, from which it took considerable time to recover. The runaway animal was captured later down by the river.

Master Willie Conline broke his arm just above the wrist while playing football one day last week.

Mr. and Mrs. William Watson, of Coleman were the guests of Mr. and Mrs. John Hutten, on Sunday.

Quite a bunch of the Bellevue sporting fraternity took in the Rabbit at Fernie on Tuesday night.

The new Fairmont hotel at Maple Leaf was formally opened last week with a dance and supper.

Mrs. Clara Pearson, of Calgary, and Mr. Eugene Pearson, of Edmonton, are visiting their parents here.

Mrs. J. A. Lewis, of Clifton, Ontario, is visiting in Bellevue, the guest of her son, the Rev. W. H. Lewis.

Thos. Longford went to Lethbridge on Monday to meet his wife who is returning from a visit to the old land.

Mrs. E. H. Christie has been laid up for a week with a sprained ankle. We are pleased to see her around again.

The fan at the head of No. 1 mine was struck by lightning on Monday and closed things down for a day or two.

The foundation for the new school is completed. It is hoped that the building will be ready for use early in the fall term.

The local Sunday school, which has been closed up for some time on account of the epidemic of measles, reopened last Sunday.

The Bellevue band rendered an open air concert last Sunday evening. Next Sunday they will play at Hillcrest at 8 o'clock in the afternoon.

Dr. and Mrs. MacKeay have returned from a trip through the United States where the doctor has been taking in the clinics at some of the prominent hospitals.

The local football association entertained their friends together with the Coal Creek team and rooters at a smoker in the Socialists hall on Saturday night.

The Ramblers' Club completed their second annual camp at Crows' Nest last week. The boys were in charge of W. H. Irwin and Walter Mills. Weather conditions, etc. made it possible for the boys to have the time of their lives, and it was with deepest regret that they had to start for home.

Mr. J. McPhail Waggett, the eminent lecturer, will visit some friends in The Pass shortly. An effort will be made to get him to give his famous lecture on "Mark Twain" in Bellevue, and at other Pass points. If the effort is successful, it will give The Pass a literary treat seldom excelled. Mr. Waggett is bubbling over with humor and is an artist at entertaining.

The Bellevue and Coal Creek football aggregations met in a hotly contested battle on the gridiron on Saturday. Everybody looked forward to this as the game of the season, and were not disappointed. Coal Creek were backed by such a bunch of rooters as is seldom seen in The Pass, and from the first kick-off things were in an uproar. Coal Creek scored the first goal early in the game on a close shot, and at half time were in the lead with the score 1 to 0. Bellevue scored off a penalty in the second half and it looked like a draw until a few minutes before the final whistle when Tommie March kicked through a goal, and it won the game for Bellevue. The game was strenuous throughout, and the large crowd of spectators were entertained by a series of spectacular plays. Bellevue is now tied with Coal Creek for first place in the league.
